## Impact Your Industry!

The Insurance Scholarship Foundation of America (ISFA) is one of the few scholarship foundations exclusively for the insurance industry. The Foundation is incorporated as 501(c)(3) nonprofit public charity. A volunteer Board of Directors, comprised on industry leaders, governs the Foundation.

Understanding that education provides an individual the freedom to learn and the power to improve, the members of NAIW founded the ISFA in 1993 solely to provide the dollars needed for insurance education. The Foundation is proud of the measurable difference it has made and challenges our industry partners to share in this critical effort.

Through your contributions, you invest in the individual achievements that lead to industry-wide success.

### Our Mission:

“To promoting excellence in the insurance industry by underwriting the education of current and future employees.”

### Our Scholarship Programs:

**College Scholarship:** offered to junior and senior students whose major or minor course of study is Insurance, Risk Management, or Actuarial Science. The Foundation has partnered with Marsh and McLennan to offer the Marsh Insurance Scholars Award annually. College scholarships are awarded annually in June.

**Professional Scholarship:** offered to men and women employed in the insurance industry who are pursuing a designation program, studying other industry courses, or completing their college degree. The Foundation has partnered with the CPCU-Loman Education Foundation and Canal Insurance Company to award professional scholarships. Scholarships are awarded in October, February and June.

### Scholarships Awarded to Date:

More than \$342,500 has been awarded in professional and college scholarships since 1993.

### Our Vision:

To be the largest and most recognized provider of insurance-related scholarships in America

### Our Core Values:

Provide a solid foundation for everything we do. Because we place emphasis on these values, our donors, scholarship applicants and recipients, business partners and employees always know where we stand – and what we stand for:

- Continuous Learning
- Integrity
- Excellence
- Financial Stability

### ISFA Benefits to the Insurance Industry:

- Provide scholarships to current industry professionals to enhance their education and growth.
- Promotes positive public relations between the industry and the academic world.
- Perpetuates new talent in work force by providing scholarships to university students pursuing insurance as a career.

### How You can Help!

To truly impact the industry, ISFA must raise its assets substantially to ensure its continued ability to provide much-needed scholarships to professionals and college students.

**General Donation:** Your donation to our general scholarship fund will assist us in reaching our goal of “Promoting Excellence Through Education...and Growing to Award More Scholarships.”

**Named Scholarship:** Establish a named scholarship in your company’s name by creating a long-term agreement, aligned to your requests to fund either college or professional scholarships. A named scholarship would give industry recognition to your company as a leader in providing insurance education. Contact the Foundation office for additional information.

Visit the Foundation’s website [www.inssfa.org](http://www.inssfa.org) for additional Sources of Funding options.
